Document Use Tip Sheet

This tool provides practical tips to help you improve your Document Use skills. Review each of the tips below and practice the ones that are the most relevant to your learning needs.

General Tips

- Use your finger or a ruler to follow rows or columns in a table.
- Use headings to find information quickly.
- Look for visual cues such as font size, bolded or highlighted text that may emphasize important information.
- Look for characters or symbols which may provide special instructions (e.g. asterisks).
- Write legibly and stay within the allocated spaces.
- Use words that are easy to read and understand when entering information.
- Scan documents several times to ensure the information you have entered is complete and accurate.
- Read instructions carefully before completing forms or questionnaires.
- Complete documents in the recommended order.
- Read labels and headings carefully before entering information.
- Identify common shapes and colours to help understand signs and symbols (e.g. diamond represents warnings; red represents danger or stop).
- Ask questions if you do not understand what you see on a sign, display or document.

Higher Level Tips

- Identify what information is needed before searching through documents.
- Scan documents for keywords, graphs and/or diagrams to gain a better understanding of the material.
- Use lists, such as a table of contents or an index page, to find specific information contained in manuals or reports more quickly.
- Use legends to help interpret information in diagrams or graphs.
- Use the scales provided on maps to practice estimating distances between two locations. Use a string to measure the length of irregular routes then place the string against the scale to determine an approximate distance.
- Make a glossary of terms commonly found in forms or on signs in your workplace.
- Look at similar forms to see how they have been completed before starting new forms.
- Place graphs side by side to make comparisons, calculate information, or arrive at conclusions.
